

RISHI KUMAR S

Full Stack Developer — Angular · Node.js · REST APIs

Puducherry, India | +91 7305594312 | rishikumar061119@gmail.com | linkedin.com/in/rishi-s-a79416437 | rishikumar-devportfolio.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years building production web applications with Angular, Node.js, Express.js, and Microsoft SQL Server. Architected an AI/OCR invoice-extraction system processing 10+ document types with strict anti-hallucination rules, cutting manual data entry and accelerating fraud detection workflows. Delivers reliable, production-ready features across 3+ concurrent projects in fast-paced Agile teams, maintaining 99%+ system uptime.

CORE COMPETENCIES

Full-Stack Web Development · API Integration · OCR & AI-Based Automation · Payment Gateway Integration · Database Management · Linux Server Deployment · Bug Fixing & Application Support · Web Security Testing · Agile/Fast-Paced Delivery

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript
- **Frontend:** Angular, HTML5, CSS3, Bootstrap, DevExtreme
- **Backend:** Node.js, Express.js, RESTful API design
- **Database:** Microsoft SQL Server (MSSQL), SQL query optimization
- **Integrations:** OpenAI API (OCR/AI automation), Cashfree Payment Gateway, SmartPing WhatsApp API, SMTP, Postman
- **Deployment & Tools:** Linux servers (PuTTY, WinSCP), Vercel, VS Code
- **Version Control:** Git, GitHub
- **Security:** Burp Suite (web application security testing)
- **AI Tools:** Prompt Engineering, ChatGPT, OpenAI API

PROFESSIONAL EXPERIENCE

Full Stack Developer — Swipe to Future Technologies

Aug 2023 – Present

- Design, develop, and maintain scalable web applications using Angular, TypeScript, JavaScript, Node.js, and Express.js across multiple concurrent client engagements.
- Build responsive, user-friendly, and high-performance front-end applications using Angular, HTML5, CSS3, and DevExtreme.
- Architected a domain-specific AI prompt system for automated OCR invoice extraction across 10+ bill types (hotel, fuel, medical, travel), enforcing strict JSON schemas and anti-hallucination rules to support downstream fraud and duplicate detection.
- Integrated OpenAI APIs to automate manual invoice-processing workflows, cutting manual data entry time and improving extraction accuracy.
- Built and integrated RESTful APIs and backend services connecting front-end applications to business logic and third-party systems.
- Integrated Cashfree Payment Gateway to enable secure, reliable online payment processing for client applications.
- Wrote and optimized SQL queries and managed database operations in Microsoft SQL Server (MSSQL), maintaining data integrity across production systems.
- Administered ServiceNow modules — Incident, Problem, Change, IT Asset Management, and Request Fulfillment — supporting IT operations for internal and client teams.
- Maintained backend systems and IT infrastructure at 99%+ uptime through proactive monitoring and troubleshooting.

- Deployed and maintained applications on Linux servers (PuTTY, WinSCP) and hosted web applications on Vercel, ensuring smooth, low-downtime release cycles.
- Performed web application security assessments using Burp Suite, identifying and remediating vulnerabilities before release.
- Collaborated with designers, developers, QA engineers, and clients in Agile/Scrum ceremonies (sprint planning, stand-ups, backlog grooming, retrospectives) across 3+ concurrent projects.
- Mentored junior design staff on frontend implementation, ensuring UI/UX consistency with product goals.
- Troubleshoot production issues, optimize application performance, and provide ongoing support to ensure system reliability.
- Utilize AI prompt engineering techniques to improve development productivity and accelerate feature delivery.

PROJECTS

StayBazar — Corporate Travel & Accommodation Platform

Jan 2024 – Present

- Staybazar is a corporate travel and accommodation platform that helps companies manage their employees' business travel requirements.
- We provide services like hotel and serviced apartment bookings, along with travel ticketing such as flight and other transportation bookings.
- In simple terms, Staybazar acts as a bridge between corporate companies and travel/accommodation partners.
- Companies can raise travel or stay requirements, and it would go to the Designated managers of the employees and after their approval we would complete the booking, Staybazar helps manage the booking process from requirement to confirmation.
- I was working as a Developer there, mainly handling the website and internal systems. My work included developing new features, fixing bugs, improving existing functionalities, automating manual processes, and building solutions based on business requirements.
- Administered ServiceNow modules — Incident, Problem, Change, IT Asset Management, and Request Fulfillment.
- Oversaw frontend development (HTML, CSS, JavaScript) and mentored junior design staff, ensuring UI/UX alignment with product goals.
- Maintained backend systems, SQL databases, and IT infrastructure with 99%+ uptime and strict data integrity standards.

Vidan LMS — Learning Management System

Aug 2023 – Dec 2023

- Feature-rich Learning Management System for schools, institutes, and organizations to create, manage, and deliver online learning content across web and mobile platforms.
- Developed frontend UI modules including course management, student dashboards, and reporting screens, plus responsive, mobile-friendly layouts for a seamless cross-device experience.
- Built and integrated backend APIs using Node.js and Express.js to support core application functionality.
- Participated in continuous product enhancement cycles — shipping new features, fixing bugs, and improving UX based on client feedback.

CERTIFICATIONS

- Microsoft SQL Server Certification — Verified Certification

EDUCATION

- B.Tech, Information Technology — Sri Manakula Vinayagar Engineering College, 2021

I hereby declare that the above information is true and accurate to the best of my knowledge. — Rishi Kumar S
